

Group Exercise: Therac-25

Group members:

Section (circle one)	12:30pm	2:00pm
-------------------------	---------	--------

(1) Find two sources that describe the Therac-25. What are your sources?

(2) When was the Therac-25 developed and deployed?

(3) How many patients were affected by "the issue" with the Therac-25?

(4) What was "the issue" with the Therac-25? Who *could* be considered responsible for this issue?

- (5) Choose one of the four main ethical frameworks we have discussed so far in class. According to your selected approach, what would be the main ethical issues surrounding the Therac-25 accidents?
- (6) What could have prevented "the issue" with the Therac-25? If you were designing a health technology today, how would you approach it?
